

## Your students can use the MyMathLab Plan to practice what they are learning

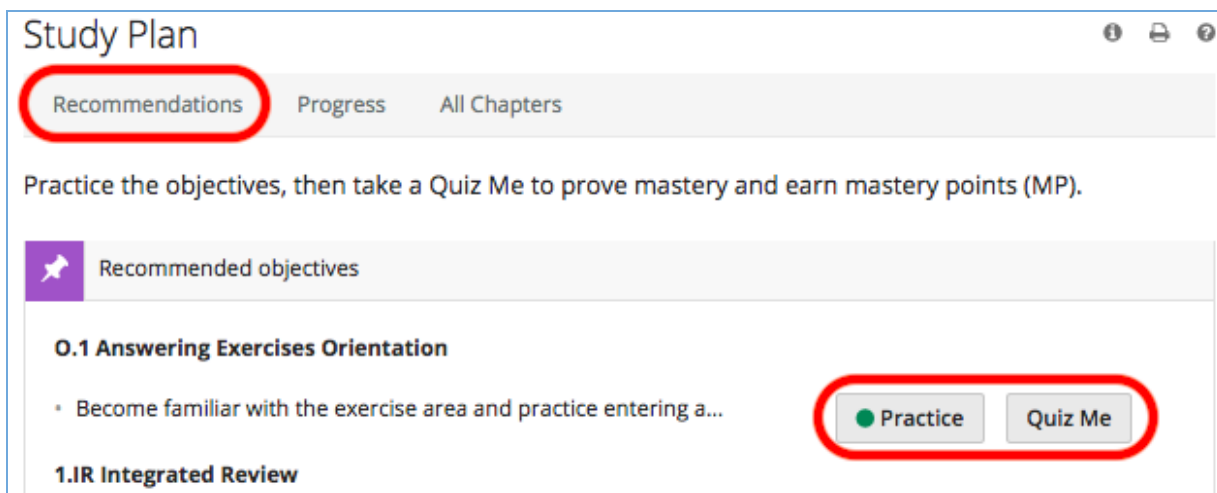

The Study Plan allows students to practice questions that are very similar to the questions in the textbook or on assignments. Students can practice, prove mastery, and continue to move forward through the material at their own pace.

### Teachers—follow these steps to use the Study Plan.

1. Login to your MyMathLab for School account.
2. Create your MyMathLab course based on the desired book/level.
3. Once students are enrolled in your course, they will see a button in the left navigation bar for the **Study Plan**.
4. By default, a student's Study Plan is customized by their performance on:
  - a. Assigned tests
  - b. Assigned quizzes
  - c. Sample tests from Pearson
  - d. Quiz Me from the Study Plan

*Note: You can modify these settings on the Study Plan Manager page (under Course Tools in the left nav bar).*

5. Your students can easily access sample tests from Pearson in order to start customizing their Study Plan. You have the option of hiding those tests and assigning your own.
6. After taking an assigned or a sample test, a student's Study Plan Recommendations page will reflect any learning objectives they've mastered and show mastery points earned. Any topics that are not yet mastered are accessible from the Study Plan for further practice. Students click the **Practice** button to work on the exercises. Students click the **Quiz Me** button when they are ready to demonstrate mastery.

7. The Study Plan All Chapters page provides a table of contents view of the student's Study Plan. Students can expand and collapse chapters and sections to find the associated exercises. Purple (and sometimes orange) pushpins point to the learning objectives that they should work on next.

**Study Plan**

Recommendations Progress **All Chapters**

**To use your Study Plan:**

1. Create recommendations on what to study by doing an assignment.
2. Practice the recommended objectives [ 📌 ].
3. When you're ready, prove mastery [ 🎓 ] and get MPs by completing a Quiz Me or an assignment.

☒ All ☐ Show recommended study 📌

Study Plan Contents	MP Earned	Time Spent
<input type="checkbox"/> Ch. O: Orientation Questions for Students 📌	0/1	
<input type="checkbox"/> Ch. 1: Review of Real Numbers 📌	1/71	
<input type="checkbox"/> Ch. 2: Equations, Inequalities, and Problem Solving	0/71	

8. After students have practiced their Study Plan exercises, the Quiz Me button will generate a short quiz that is focused on a specific learning objective. Students use these quizzes to demonstrate mastery and earn mastery points.
9. The Study Plan Progress page uses color coding to provide a pictorial view of how students are doing in each section of the course.

**Study Plan**

Recommendations **Progress** All Chapters

**Objectives:**

<input checked="" type="checkbox"/> Mastery points earned	1/907	📌 Recommended study
<input type="checkbox"/> Practiced, not yet mastered	0	
<input type="checkbox"/> Remaining	906	

**Ch. O: Orientation Questions for Students**

☐ O.1

**Ch. 1: Review of Real Numbers**

<input checked="" type="checkbox"/> 1.1R	1.1	1.2	1.3	1.4
1.5	1.6	1.7	1.8	1.9R

10. If you'd like to change the requirements for mastery or the way the Study Plan is displayed to students, click on the Study Plan Manager button under Course Tools in the left nav bar.
